Make America White Again

NOT!

Let's be clear, in the strictest sense, America has never been white. When whites came to the new world, their term so they could claim it as their own, it was inhabited by an indigenous people. They called them Indians, but they were native to the land (Native Americans). There is evidence that they inhabited [Oregon about 14,500](#)

[years ago](#). The first Europeans didn't arrive in the continental United States until 1513. They began bringing [Africans to the States in 1619](#) (very early in the settlement of the Country). So, when exactly was America white? When people say, "make America White again", they want to return to a time when Whites controlled all the wealth and

power in the Country. People of color were considered subhuman, even in the constitution, and had no expectation to the right of life, liberty and the pursuit of happiness. They existed only in service to whites.

This message is to all of you who boarded the Trump train in the belief that he could reverse the demographic changes that are fast coming down the tracks. Try as he might he cannot return you to a time when whites were supreme, that's not going to happen. We will never go back to that time. The Country is richer for the diversity that is America and the more perfect and

inclusive union that we strive to attain. Trump can try to use the courts and the law to reach his objective, but we will resist, and we will win. We've come too far to turn back the clock and we are true believers in the ideal that is America.
